

POOL RENOVATION UPDATE

August, 2019

- The new perimeter railing is now substantially complete. There are still a few sections to put in along with the handrail for the bridge crossing and all of the hardware. Our vendor will complete the remainder of the fencing when they return to install the pool equipment yard fencing.
- The lamp posts have been installed around the pool. The lamp posts will be installed on the deck next week.
- Substantial progress has been made with the concrete restoration. The majority of the ceiling in the equipment room and mens restroom are complete. We will be finishing up with the damaged ceiling of the breezeway and several areas in womens restroom next week.
- The new geothermal equipment is almost completely installed. This work should be completed this week.
