

POOL UPDATE 10/18/2019

As often happens with renovations, unforeseen problems arise. We are fortunate that Compass Construction and Velocity, the engineering company overseeing our pool renovation, have worked diligently to resolve any and all issues that have arisen.

Currently there is a problem handling the drainage related to the backwash system. Compass and Velocity have found a more efficient way to handle the drainage. Once the work is completed, the final inspection will be scheduled.

The pool is projected to reopen in 10 to 14 days. We want the pool to be beautiful and to operate at peak performance.

Your patience is very much appreciated!

Regards,
Janice Schienke
