

Caution Notice to Our Community

We are writing to give you a note of caution and ask for your help.

Our community has aged; it is now over 25 years old and, like us, needs some care along the way.

Our walking, sight, and balance have changed.

We know that the infrastructure has aged, trees have grown, bricks, sidewalks have shifted, and roads have worn, creating some hazards.

The Master Board is working on these issues, but it will take your help.

First, please keep alert when walking or biking keeping an eye open for hazards, especially at night. Reduce distractions as you travel.

If you see a trip hazard, please let your association President know, or someone in the member center office so corrective action can begin. If possible, take a picture, including how we can find the hazard, and email it.

We know some fixes can be done quickly, while others will require permits, obtaining quotes, and scheduling vendors.

Let's work together to keep all in our community safe.
